J. V. BAILEY NURSERIES

DAYTON'S BLUFF STATION
ST. PAUL, MINN.

LaSalle 98421—ST. PAUL TELEPHONES—LaSalle 9364

1932 CATALOG

This catalog contains our new scale of prices. We offer our usual high quality stock at a great reduction in prices over previous years. Save money by ordering from this catalog.

V. K. Bailey

J. V. Bailey

Gordon Bailey

A PERSONAL WORD TO OUR FRIENDS AND CUSTOMERS

HEALTHY, hardy stock and fair dealing are the principles on which we have built the thriving business we now enjoy. It is very gratifying to know that our customers are well pleased with our stock, for we receive many letters each year praising the high quality, careful packing and the good condition in which it was received.

When buying from J. V. Bailey Nurseries direct you save the commissions paid to agents and know for a certainty that you are getting high quality stock from a nursery that has a high standard to maintain.

TERMS OF SALES

Cash with order, or will accept one-fourth of purchase price in advance and ship goods C. O. D. for the balance. All stock priced F. O. B. St. Paul or at nursery.

We use the greatest precautions to have everything we send out true to name, but in the event the nursery stock or any part of it, sold by J. V. Bailey Nurseries, should prove to be untrue to the name under which it is sold, or prove not to be of the kind or quality of nursery stock it was sold for, or ordered for, a replacement of the stock as originally ordered, or intended to be sold, without charge therefore, or a refund of the purchase price, shall be a completed and entire satisfaction for any and all liability therefore of the seller, and such replacement or a refund of the purchase price it is agreed shall be the liquidated damages and all the damages to which the purchaser shall be entitled by reason of the premises. Except for such limited liability as herein set out, the seller, J. V. Bailey Nurseries, gives no undertaking or warranty expressed or implied as to the description, quality, growth, productiveness, or any other attribute of the nursery stock sold by J. V. Bailey Nurseries. This statement contains all the agreements between the parties, and there are no verbal agreements or representations with respect to the same except as herein set out.

LOCATION OF NURSERY

We are located at the St. Paul city limits between Highwood and Newport, just off State Highway No. 3, seven miles from downtown. Visitors always welcome.

A certificate of inspection accompanies each order

HARDY SHRUBS

OUR homes become homes in the true sense, only when they are planted. Ornamental shrubs are the foundation of all landscape plantings. We offer a wide selection of varieties with which to beautify your home and garden. Never before have we been able to offer our high quality stock at such low prices. Take advantage of these prices and landscape your grounds this year.

Barberry, Japanese—This low growing plant is best used as a border where the view of other objects is not to be obscured. It is a spreading plant with beautiful foliage that turns a scarlet in the latter part of the season. A hardy plant that needs very little attention in the landscape planting.

18 to 24 in., 25c each; \$2.25 per 10. 12 to 18 in., 20c each; \$1.75 per 10.

Barberry, Redleaf—A new plant similar in every respect to the Japanese Barberry except that it has red leaves all summer. Its deep red leaves add a note of color and contrast to any planting.

12 to 18 in., 60c each; \$4.50 per 10.

Burning Bush—Spreading in growth, with peculiar corky bark along the branches. Leaves small, oval. Berries scarlet, very ornamental. The foliage turns a most beautiful crimson in autumn. Height about 6 feet.

2 to 3 ft., 75c each; \$6.50 per 10.

Caragana—On account of its extreme hardiness this shrub is well adapted to dry exposed conditions. Height 8 to 10 feet.

3 to 4 ft., 35c each; \$3.00 per 10. 2 to 3 ft., 25c each; \$2.00 per 10.

Cotoneaster—An attractive, beautifully formed shrub with thick, glossy leaves, turning to red in the fall. Small white flowers in early summer followed by large black berries which remain on the bush nearly all winter. Perfectly hardy.

3 to 4 ft., 40c each; \$3.50 per 10. 2 to 3 ft., 35c each; \$3.00 per 10.

Philadelphus Virginialis

Currant, Alpine—A very dense growing shrub, with fine, dark green leaves. Height 3 to 4 feet. A very desirable plant where the soil is well drained.

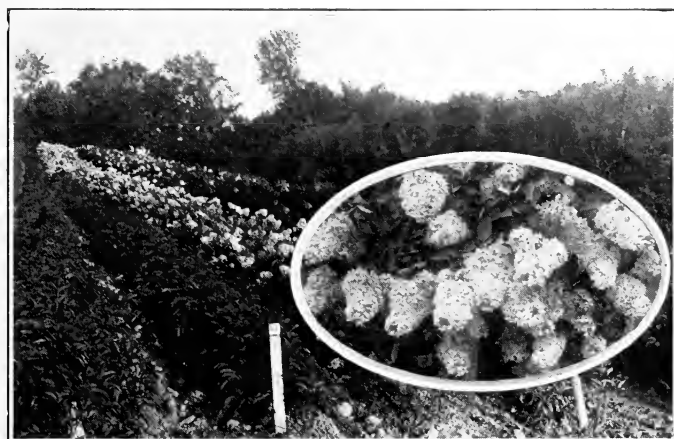

12 to 18 in., 40c each; \$3.50 per 10.

Dogwood, Golden Twigged—Similar to the Red Dogwood except that the bark is yellow and the bush is more dense in its habit of growth.

2 to 3 ft., 50c each; \$4.50 per 10.

Dogwood, Red-Twigged—Grows 8 to 10 feet high, with clusters of white flowers, succeeded by ornamental berries in the fall. Stem and branches turn a blood red in the winter.

2 to 3 ft., 30c each; \$2.50 per 10.

Hydrangea P. G.

Hydrangea Arborescens

Dogwood, Variegated—A variety similar to the Red Dogwood except that the leaves are green with a white stripe through the center. A very desirable shrub for group planting.

2 to 3 ft., 60c each; \$5.50 per 10.

Elder, Cutleaf—A shrub of about the same habits of growth as the common Elder, with green foliage which is very deeply cut. It adds a delicate appearance to a group of shrubs.

2 to 3 ft., 50c each; \$4.00 per 10.

Elder, Golden—A Shrub of medium height, with bright yellow foliage. Valuable in group planting in contrast to the mass of green foliaged plants.

3 to 4 ft., 60c each; \$5.50 per 10.

Honeysuckle, Morrowi—Blossoms freely and is covered with bright red berries from August until winter. Height 5 to 6 feet. Pink blossoms.

2 to 3 ft., 50c each; \$4.50 per 10.

Honeysuckle, Tatarian Pink—A very attractive shrub that produces an abundance of fragrant flowers in the spring, and bright red fruit in autumn. Plant is upright in growth and attains a height of about 8 feet.

3 to 4 ft., 50c each; \$4.50 per 10. 2 to 3 ft., 40c each; \$3.50 per 10.

Honeysuckle, Tatarian Red—Similar to Tatarian Pink except that the flowers are a deep red.

3 to 4 ft., 60c each; \$5.00 per 10.

Hydrangea Arborescens (Hills-of-Snow)—Excellent for borders or low foundation plantings. Blossoms profusely in July and first part of August. Height 3 to 4 feet. Well adapted to shady places.

2 to 3 ft., 60c each; \$5.00 per 10. 18 to 24 in., 40c each; \$3.50 per 10.

Hydrangea Peegee—Every home should have some of these in the yard. Blossoms in late summer. Flowers are white at first and then turn to a pink and later to purple. Does well in partial shade.

2 to 3 ft., 60c each; \$5.00 per 10. 18 to 24 in., 40c each; \$3.50 per 10.

LILACS

Common Purple—A well-known shrub.

2 to 3 ft., 25c each; \$2.00 per 10.

French Hybrids—The bush is a little smaller than the common Lilac, growing 6 to 8 feet high, but there is no comparison in the flowers. The flower stalks of the hybrids are many times as large as the common Lilac. It is not uncommon to see flower spikes 15 inches long. The beauty of these shrubs is appreciated by the public as is shown by the great demand. We have all colors.

Prices: 3 to 4 ft., 90c each; \$7.50 per 10.

2 to 3 ft., 75c each; \$6.50 per 10.

Belle de Nancy—Rose with White Center.

Jacques Callot Lilac

Charles Joly—Large, double, red. Very prolific.

Comte Horace de Choiseul—Double Rosy White.

Jacques Callot—Single Purple.

President Grevy—Very large, double blue.

Virginalis—Large Purple.

Persian, Rothmogensis—A very profuse blooming, red Lilac. The plants do not grow more than 5 to 6 feet high. 2 to 3 ft., 60c each; \$5.00 per 10.

Villosa—Dwarf growth, broad dark leaved; pinkish lilac flowers in long, loose panicles. Blooms later than most lilacs. 2 to 3 ft., 40c each; \$3.50 per 10.

Philadelphus, Big Seentless—A very large flowered variety of Mockorange. Height 7 to 8 feet, 3 to 4 ft., 60c each; \$5.50 per 10. 2 to 3 ft., 50c each; \$4.50 per 10.

Philadelphus, Coronarius—Blooms in May, in very graceful sprays, slightly scented. Good for medium height screens. 2 to 3 ft., 60c each; \$5.00 per 10.

Philadelphus, Golden—A compact shrub of an ultimate height of 4 feet, with very brilliant yellow foliage. It is a mass of white flowers in May and June. 12 to 18 in., 75c each; \$6.50 per 10.

Philadelphus, Lemoinei—White flowers in May. A small shrub attaining a height of about 5 feet. Branches slender and arching. One of the best dwarfs, spring flowering, sweet scented shrubs.

2 to 3 ft., 60c each; \$5.50 per 10.

Tartarian Honeysuckle

Double Flowering Almond

Philadelphus, Virginal—A magnificent new variety. Medium height with good foliage and compact habit. Flowers large, double and semi-double.

2 to 3 ft., 60c each; \$5.00 per 10. 13 to 21 in., 50c each; \$4.00 per 10.

Almond, Double Flowering—The double rose-like, pink flowers cover the branches in May. Somewhat superior to Flowering Plum except for hardiness.

3 to 4 ft., \$1.00 each; \$9.00 per 10. 2 to 3 ft., 75c each; \$6.50 per 10.

Crab, Bechtel's Double Flowering—A large shrub or small tree, attaining a height of about 10 feet. Produces an abundance of double pink flowers in May. The fragrant flowers resemble miniature roses.

3 to 4 ft., \$1.00 each; \$9.00 per 10. 2 to 3 ft., 75c each; \$6.50 per 10.

Plum, Double Flowering—Dwarf in habit and produces masses of double pink flowers in early spring. This plant is very much like the pink double Flowering Almond, but is harder and a better plant for our climate. Height 6 to 8 feet.

4 to 5 ft., \$1.00 each; \$9.00 per 10. 3 to 4 ft., 75c each; \$6.50 per 10. 2 to 3 ft., 60c each; \$5.00 per 10.

Plum, Purple-Leaf (Newport)—A beautiful dark purple-leaved variety of Plum, carrying its rich color throughout the season. This is valuable in group planting where varied coloring is desirable. Height 8 to 10 feet. 5 to 6 ft., \$1.00 each; \$9.00 per 10. 4 to 5 ft., 75c each; \$6.50 per 10. 3 to 4 ft., 50c each; \$4.00 per 10.

Russian Olive—A large shrub with attractive silver gray foliage. Desirable in large group plantings. 3 to 4 ft., 50c each; \$4.00 per 10. 2 to 3 ft., 40c each; \$3.00 per 10.

Snowball—A popular shrub attaining a height of 6 to 8 feet and having large, round compact clusters of white flowers in May and June. 2 to 3 ft., 75c each; \$6.50 per 10.

Snowberry—A very valuable shrub in group plantings. Conspicuous on account of the masses of snow white berries produced in September and remaining on the bushes into the winter months. Height 4 to 5 feet. 2 to 3 ft., 40c each; \$3.50 per 10.

Spirea Anthony Waterer—Beautiful dark small foliage and dense, rounded growth. Produces an abundance of rosy crimson flowers during July and August. Height about 2 feet. Well adapted for foundation and low border plantings. 15 to 18 in. (heavy), 35c each; \$3.00 per 10. 12 to 15 in. (heavy), 30c each; \$2.50 per 10.

Spirea Callosa Alba—Similar to Anthony Waterer in growth and habit. Produces an abundance of white flowers, June to August. 12 to 18 in., 35c each; \$3.00 per 10. 10 to 12 in., 30c each; \$2.50 per 10.

Spirea Anthony Waterer

Spirea Frobelli—Similar to Anthony Waterer, but a trifle taller with broader and darker leaves. 18 to 24 in., 40c each; \$3.00 per 10. 12 to 18 in., 35c each; \$2.50 per 10.

Spirea Sorbifolia (Ash-Leaved Spirea)—A medium size shrub producing white, feathery spikes of flowers about 6 to 8 inches long on the ends of the branches. Blooms in July. 2 to 3 ft., 50c each; \$4.50 per 10.

Spirea Thunbergi—Forms a dense, fluffy bush, 3 to 5 feet high; the feathery foliage, which is a peculiar but pleasing shade of yellowish green, changes in autumn to bright red and orange. Produces masses of pure white flowers very early in the spring. 2 to 3 ft., 60c each; \$5.00 per 10.

Spirea Vanhouttei (Bridalwreath)—Very desirable on account of its beautiful foliage and graceful habit of growth, as well as the masses of white flowers. 3 to 4 ft., 40c each; \$3.50 per 10. 2 to 3 ft., 30c each; \$2.50 per 10. 2 to 3 ft. (light), 20c each; \$1.50 per 10.

Tamarix—Very fine foliage producing a fern like effect. Attains a height of 6 to 8 feet. Pink flowers July to September. 3 to 4 ft., 60c each; \$5.00 per 10.

Willow, Pussy—This is an improved variety of the wild Pussy Willow, producing very large catkins. 3 to 4 ft., 35c each; \$3.00 per 10.

Spirea Vanhouttei (Bridalwreath)

Hedgewood, note the compact growth of this hedge

HEDGES

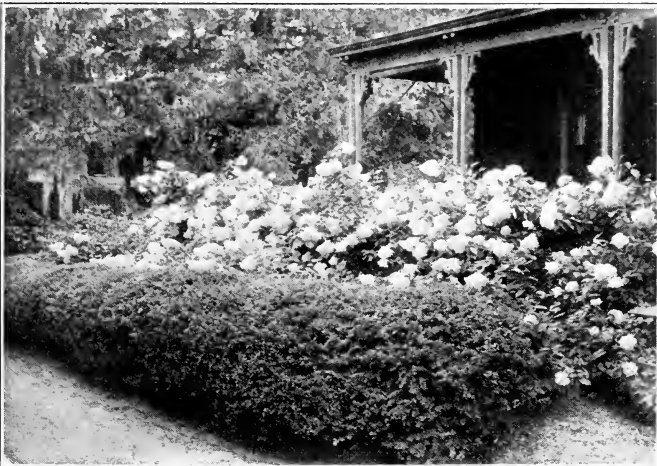

HEDGES are useful from both a utilitarian and an artistic standpoint. An ornamental hedge frames the lawn and gives it a background. 50 plants at 100 rates.

Arborvitae, American—This evergreen hedge plant stands trimming very well. The bright green foliage and fragrance of the Arborvitae makes it very desirable. We offer stock that has been transplanted twice.

18 to 24 in., \$7.50 per 10; \$50.00 per 100.
12 to 18 in., \$5.00 per 10; \$35.00 per 100.

Barberry, Japanese—This low growing plant is best adapted for a hedge used as a border where the view of other objects is not to be obscured. This is a spreading plant with beautiful foliage that turns a scarlet in the latter part of the season. Used also as individual specimens and as border plants in groupings. May be trimmed or left informally.

18 to 24 in., heavy, \$2.25 per 10; \$20.00 per 100. 12 to 18 in., heavy, \$1.75 per 10; \$12.50 per 100. 10 to 12 in., \$1.25 per 10; \$8.00 per 100.

Japanese Barberry Hedge

Buckthorn—Probably the best hedge plant where a rather high hedge or screen is wanted. This plant is very hardy, a vigorous grower, stands pruning exceptionally well.

2 to 3 ft., \$2.50 per 10; \$20.00 per 100. 18 to 24 in., \$2.00 per 10; \$15.00 per 100. 12 to 18 in., \$1.50 per 10; \$10.00 per 100.

Caragana—On account of its extreme hardiness it is well adapted to dry exposed conditions.

3 to 4 ft., \$3.00 per 10; \$20.00 per 100. 2 to 3 ft., \$2.00 per 10; \$15.00 per 100. 18 to 24 in., \$1.50 per 10; \$10.00 per 100. 18 to 24 in., seedling 2 yr., \$5.00 per 100.

Cotoneaster—The thick glossy leaves of this beautiful shrub turn to an attractive red in the fall. Stands trimming well. A medium height hedge.

3 to 4 ft., \$3.50 per 10; \$30.00 per 100.

Dogwood, Red-Twigged—A very satisfactory hedge where a tall screen is desired.

Branches turn a blood red in the winter.

2 to 3 ft., \$2.50 per 10;
\$15.00 per 100.

Hedgewood (Salix Uralensis)—A new plant which is very desirable for either a trimmed or untrimmed hedge. Its small red twigs, branches and beautiful fine gray leaves give the hedge an appearance of gracefulness. Hedgewood is one of the hardest plants we have, and will do well in any soil.

2 to 3 ft., \$2.50 per 10;
\$12.50 per 100. 18 to 24 in., \$2.00 per 10; \$8.00 per 100.

CLIMBING VINES

Bittersweet—A native vine in Minnesota. Produces an abundance of bright red berries that are used for decorative purposes in the winter. Very hardy. Good for covering trellises and screen porches.

35c each; \$3.00 per 10.

Clematis Jackmani—The most popular variety of Clematis. Produces an abundance of large, violet-purple blossoms in July and August.

\$1.00 each; \$9.00 per 10.

Engelmann Ivy—There is none better, where one wishes a clinging vine.

This Ivy grows very fast and clings to any rough surface, such as brick or stucco. It is very hardy. 35c each; \$3.00 per 10.

Hall's Honeysuckle—A strong grower, with deep green foliage. Very free flowering and fragrant. Good for covering banks or trellises.

50c each; \$4.00 per 10.

ROSES

Baby Rambler—A Crimson Rambler which attains a height of about two feet. The red flowers are formed in profuse clusters until frost.

60c each; \$5.00 per 10.

Rugosa Rose—A very thrifty, hardy rose attaining a height of about three feet. Large, semi-double, pink blooms.

2 to 3 ft., 40c each; \$3.50 per 10.

RUGOSA HYBRID ROSES

Agnes—The best yellow in the hardy Rugosa hybrids. A profuse bloomer.

Bush is dwarf in habit. 75c each; \$6.00 per 10.

Amelie Graveraux—Carmine red, full double, very fragrant. One of the new and very choicest of Rugosa hybrids. Is a liberal bloomer, often carrying a dozen blooms within eight weeks after planting. This is a hardy and thrifty bush of beautiful foliage which makes a real attraction

as a shrub. We consider this new creation a Rose "par excellence." 60c each; \$5.00 per 10.

Blanc de Coubert—A wonderful introduction in a hardy white rose. 60c ea.; \$5.00 per 10.

Grootendorst—A new type of Rose that might properly be called a Rugosa-Baby Rambler; a cross between the Rugosa and Crimson Baby Rambler. Valuable as an individual shrub and in groups. It is absolutely hardy and continues to bloom late in the fall. 2 yr. plants. 50c ea.; \$4.50 per 10.

Hansa—Early Flowering hybrid, combining the ornamental qualities of its Rugosa foliage with the blossom beauty and the perfume of the hybrid perpetuals. The flowers are cup-shaped, double, crimson and especially fine. Blooms throughout the season. 2 yr. plants, 45c ea.; \$4.00 per 10.

Sarah Van Fleet—Wild rose pink, semi-double, open cupped flowers, fragrant. Rugosa foliage, resistant to disease. 2 year plants, 60c each; \$5.00 per 10.

CLIMBING ROSES

Excelsa—A red climbing Rose similar to Dorothy Perkins. The beautiful crimson-scarlet, double flowers are borne in large clusters and set in glossy, shining foliage. 50c each; \$4.50 per 10.

Dorothy Perkins—Climber. Clear cherry-pink blossoms, borne in great profusion. Very strong growth; foliage is glossy, bright green and persists until cold weather. 50c each; \$4.50 per 10.

Clematis Jackmani
(Purple)

Hansa Rugosa

PEONIES

WE HAVE selected and grow only the following varieties of peonies, because they have proven the most reliable. These varieties not only produce very good blooms but the plants are attractive throughout the summer by producing heavy foliage.

We furnish only strong, three to five eye divisions of the following varieties.

Felix Crousse—Very brilliant red. Medium to large, globular, typical bomb shape; fragrant; strong growth; stem rather weak. Mid-season. 60c each.

Festiva Maxima—Paper white, with crimson markings in the center. Very large and full; very tall, strong grower. Early. 50c each.

Karl Rosenfeld—Early red. Very large flower; globular, semi-rose type. Extremely vigorous grower, tall and free flowering. 75c each.

Madame Forel—Enormous, very full, double bloom, called the "Prince of Pink Peonies," a title it well deserves. 50c each.

Prince of Darkness—Typical rose type blossoms of very dark maroon. Mid-season. 75c each.

Pink—Unnamed.

30c each; \$2.50 per 10.

PHLOX

As a perennial the Phlox ranks high among the most permanent and satisfactory. The foliage is good during the entire summer and the flowers range in all shades from white to deep red and purple and last from July to October. The flower is best adapted to massed planting either in beds or along the border. The following list is recommended for beauty and hardiness.

Strong two year clumps, 25c each; \$2.25 per 10.

B. Comte—Bright amaranth red.

Eclairer—Rosy magenta.

Elizabeth Campbell—Light salmon pink.

Miss Lingard—Early white, with delicate lilac eye.

Mrs. Jenkins—A very tall growing white.

Rheinlander—Large, soft pink, with deeper eye.

Riverton Jewel—Deep mauve, with crimson center.

R. P. Struthers—Bright rosy carmine, red eye.

Rynstrom—Carmine rose.

Thor—Deep salmon pink, red eye.

IRIS

Iris are indispensable in the border planting. They are prolific bloomers and perfectly hardy. Will stand partial shade. 30c each; \$2.50 per 10.

Loreley—White, shaded with yellow.

Nibelungen—Fawn yellow.

Perfection—Blue and dark violet.

Quaker Lady—Smoky lavender, shading to deep blue.

Queen of May—Pink.

Festiva Maxima

Bleedingheart—Perfectly hardy and easily cultivated. Blooms in April and May.

50c each; \$4.00 per 10.

OTHER PERENNIALS

Because of lack of space, we are not listing the many varieties of perennials. However we have a complete line of strong, field grown roots.

25c each; \$2.25 per 10; \$20.00 per 100.

Miss Lingard Phlox

EVERGREENS

EVERGREENS present a broad opportunity for plant lovers to produce rich and beautiful effects that cannot be surpassed by any other class of plants. Evergreens are used for specimens on lawns, also extensively for massing, shelterbelts, screens, hedges, etc. They form perfect backgrounds for the flowering shrubs of early spring, for the berries of autumn and winter's tracery of bright bark and twigs. Beautiful beds of permanent color are formed by grouping together sorts of moderate growth, with contrasting foliage.

To be successful in planting evergreens, the planter should use great care to obtain stock that has been properly grown in the nursery, and frequently transplanted while growing to insure a thick, fibrous root system. We are very careful to offer only such stock as will measure up to the above mentioned important requirements, thereby saving our customers from disappointment.

In the larger size Evergreens it is necessary, for the best results, to ball and burlap the roots. That consists of digging the trees and wrapping the roots in a solid ball of dirt. The following prices include Baling and Burlapping (B & B) free of charge, where they are marked "B & B."

NOTE—Add 10% for packing "B & B" evergreens for shipment.

We grow many varieties of Evergreens of which, for the lack of space, we do not list here. Will be glad to quote prices.

Arborvitae, American—A popular Evergreen for hedges or wind-breaks which is also often used for single specimen planting.

3 to 4 ft., B & B, \$4.00 each; 2 to 3 ft., B & B, \$2.25 each; 18 to 24 in., B & B, \$1.00 each.

Arborvitae, Globe—A globe-shaped Arborvitae which does not require pruning to retain its shape. This variety is slow growing and can be used to advantage planted on either side of the entrance to a dwelling. They may also be planted in large pots.

24 to 30 in., B & B, \$5.50 each; 18 to 24 in., B & B, \$4.50 each.

Arborvitae, Pyramidal—Undoubtedly the most popular form of Arborvitae today is the Pyramidal Arborvitae. This tree fills a real need in landscaping and has a place of importance in practically every evergreen planting. Thrives best on a south or east exposure.

3 to 4 ft., B & B, \$5.00 each; 2 to 3 ft., B & B, \$2.75 each; 4 to 5 ft., B & B, \$6.50 each; 5 to 6 ft., B & B, \$8.50 each.

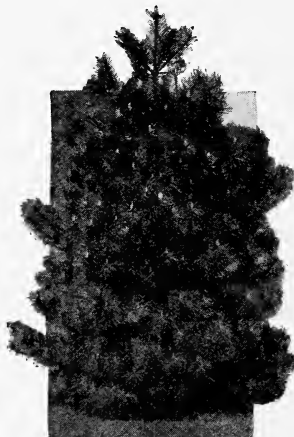

Pyramidal Arborvitae

Red Cedar

Globe Arborvitae

Norway Pine

Concolor Fir

Juniperus, Andora—A very fine dwarf spreading Juniper. Especially attractive in the late fall and winter when the needles turn a bright brown.

18 to 24 in. spread, B & B, \$5.50 each; 12 to 18 in. spread, B & B, \$4.75 each.

Juniperus Chinensis—A very satisfactory pyramidal tree. A feature which makes this tree so much desired is its extremely robust nature and the ease with which it can be transplanted.

3 to 4 ft., B & B, \$4.50 each; 2 to 3 ft., B & B, \$3.00 each.

Juniperus Communis—A dwarf spreading type of cedar. Extremely hardy.

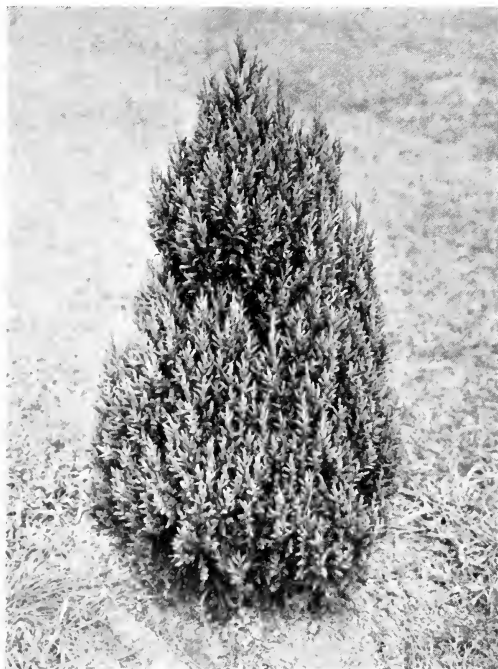

2 to 3 ft. spread, B & B, \$3.00 each.

Juniperus, Pfitzeriana—A very hardy evergreen of medium height with spreading branches. We have it available in the upright form or dwarf form. A very fine ornamental evergreen for informal planting.

2 to 3 ft., B & B, \$4.50 each.

Juniperus Sabina—A beautiful dwarf, spreading Cedar. Dark green foliage.

2 to 3 ft. spread, B & B, \$4.50 each; 18 to 24 in. spread, B & B, \$3.00 each; 15 to 18 in. spread, B & B, \$2.00 each.

Juniperus Scopulorum

Juniperus Scopulorum (Silver Cedar)—Similar to Red Cedar except that it is a beautiful silver color.

5 to 6 ft., B & B, \$9.50 each; 4 to 5 ft., B & B, \$7.00 each.

Juniperus Virginiana (Red Cedar)—This tree is valuable for group plantings as well as for specimen trees.

5 to 6 ft., B & B, \$9.00 each; 4 to 5 ft., B & B, \$6.75 each; 3 to 4 ft., B & B, \$5.50 each; 2 to 3 ft., B & B, \$3.00 each.

Pine, Mugho—Of low, dense spreading growth, with very dark green foliage. Very hardy and suitable for covering slopes.

24 to 30 in. spread, B & B, \$5.50 each; 18 to 24 in. spread, B & B, \$4.25 each; 15 to 18 in. spread, B & B, \$3.00 each; 12 to 15 in. spread, B & B, \$2.25 each; 10 to 12 in. spread, B & B, \$1.50 each.

Pine, Norway—An ornamental Pine for quick growth. It is also an exceptionally fine wind-break tree.

5 to 6 ft., B & B, \$6.00 each; 4 to 5 ft., B & B, \$4.75 each.

Pine, Ponderosa—2 to 3 ft., B & B, \$1.40 each.

Pine, Scotch—2 to 3 ft., B & B, \$1.00 each.

Colorado Blue Spruce

Spruce, Norway—For many years, Norway spruce has been highly appreciated because of its rapid growth, its thriftiness, and its heavy masses of deep green foliage.

Prices for windbreak size: 3 to 4 ft., B & B, \$3.50 each; 30 to 36 in., B & B, \$2.25 each; 24 to 30 in., B & B, \$1.75 each.

Spruce, Colorado Blue—This is the most popular Evergreen for specimen planting. Color of foliage ranges from green to a silver blue.

Price of selected blue, which are often called shiners: Above 3 ft., B & B, \$3.50 per foot; 2½ to 3 ft., B & B, \$10.00 each.

Price of Colorado, green in color, but as good in every other way; 3 ft. and up, B & B, \$1.75 per foot; 30 to 36 in., B & B, \$5.00 each; 24 to 30 in., B & B, \$3.50 each; 18 to 24 in., B & B, \$2.25 each; 15 to 18 in., B & B, \$1.75 each; 12 to 15 in., \$1.00 each.

Mugho Dwarf Pine

PLANTING EVERGREENS

Dig the hole a foot wider and deeper than the root ball. Place some good loamy top soil in the hole and set the tree a trifle lower than it stood in the nursery. Do not remove the burlap, as it disturbs root soil. It is only necessary to roll it back or cut it away from the top as the remainder will soon rot away. Then fill up around the ball with good top soil, packing firmly by tamping or settling with water and finish off with loose soil.

Spruce, Black Hill—Next to the Colorado Spruce these trees are the most popular of the Evergreens. They are noted for their deep green color and symmetrical habit of growth. Above 3 ft., B & B, \$1.75 per foot; 30 to 36 in., B & B, \$3.50 each; 24 to 30 in., B & B, \$2.50 each; 18 to 24 in., B & B, \$2.00 each.

Section of a Field of Colorado Blue Spruce and Black Hill Spruce Transplants

SHADE AND ORNAMENTAL TREES

Ash, Green—A tall rapid grower with smooth gray bark and glossy fern-like leaves. A very good shade tree.

6 to 8 ft., \$1.00 each; \$9.00 per 10. 8 to 10 ft., \$1.40 each; \$12.00 per 10.

Ash, Mountain—A beautiful lawn tree which is very attractive the latter part of the summer, when it is covered with masses of red berries. Height 15 to 20 feet.

8 to 10 ft., \$2.00 each; \$17.50 per 10. 6 to 8 ft., \$1.25 each; \$10.00 per 10.

Ash, Weeping Mountain—A novel tree for lawn planting. Its long, drooping branches nearly reach the ground.

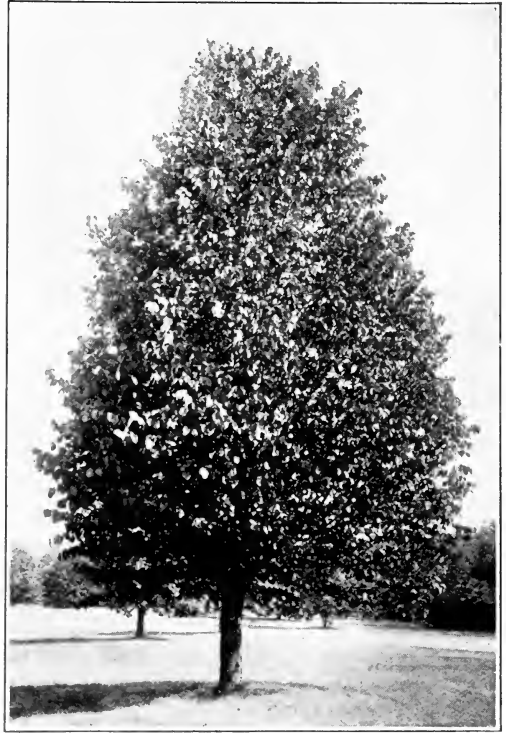

Well developed heads, \$3.00 each.

Basswood (Linden)—A very hardy tree that is used extensively in place of the catalpa in our northern climate.

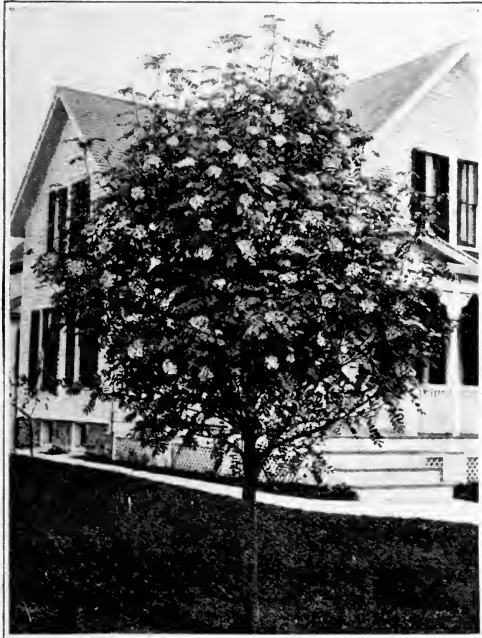

8 to 10 ft., \$2.50 each; \$20.00 per 10. 6 to 8 ft., \$2.00 each; \$15.00 per 10.

Birch, Cutleaf Weeping—An elegant, erect tree with slender drooping branches and finely cut leaves. The bark is white like the ordinary native Birch. There is no tree that will take the place of Cutleaf Birch for individual planting on the lawn.

10 to 12 ft., \$7.50 each; 8 to 10 ft., \$5.00 each; 6 to 8 ft., \$3.25 each; 5 to 6 ft., \$2.50 each.

Basswood (American Linden)

Mountain Ash

Birch, White or Paper—This native Birch can be used in place of Cutleaf Birch, but is not as ornamental.

8 to 10 ft., \$2.00 each; 6 to 8 ft., \$1.25 each.

Butternut—A well-known, hardy, nut-bearing tree.

6 to 8 ft., \$1.50 each.

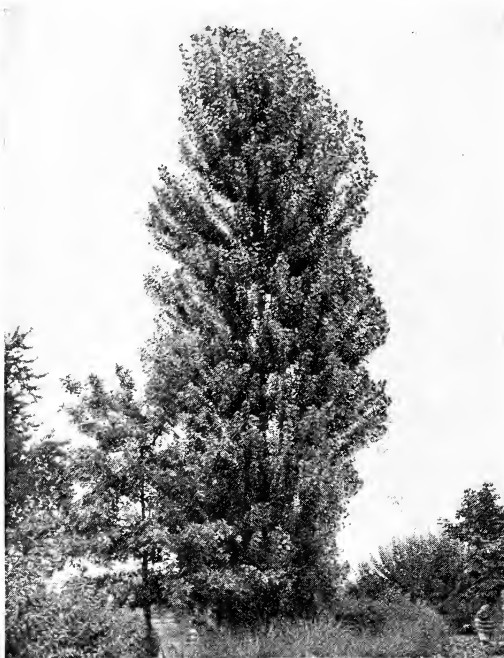

Elm, American—A magnificent tree, growing 60 to 80 feet high, with drooping, spreading branches; one of the grandest of our native trees; makes a beautiful lawn or boulevard tree. The following prices are for well shaped specimen trees. The measurement in inches means the diameter of the tree just above the ground.

2 to 2½ in., \$3.50 each; 1½ to 2 in., \$3.00 each; 1¼ to 1½ in., \$2.00 each; 6 to 8 ft., 75c each; \$6.50 per 10.

Elm, Moline and Vase—Add 25% to American Elm prices.

Elm, Chinese—A very fast growing tree. Foliage very fine textured. Promising as a very good ornamental and windbreak tree.

5 to 6 ft., branched, \$1.25 each; \$10.00 per 10.

Lombardy Poplar

Maple, Schwedlers (Redleaf Maple)—A very ornamental hard wood tree. Foliage is a bright red in the early part of the summer and then again in Autumn.
6 to 8 ft., \$4.00 each; \$35.00 per 10.

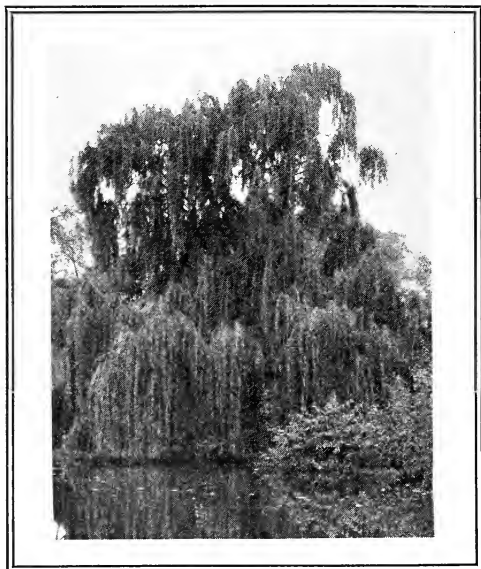

Poplar, Boleana—One of the most desirable upright growing Poplars. A tall, narrow topped tree, leaves deeply cut, woolly underneath. Very effective for framing a landscape.
8 to 10 ft., \$1.50 each.

Poplar, Lombardy—A slender tree which grows to a great height; used to good effect in some landscape plans.
10 to 12 ft., \$1.25 each; 8 to 10 ft., \$1.00 each;
6 to 8 ft., 90c each; \$7.50 per 10.

Poplar, Norway—A very hardy tree, attaining a height of about 50 feet. Very good for a quick windbreak.
6 to 8 ft., 60c each; \$5.00 per 10. 5 to 6 ft., 50c each; \$4.00 per 10.

Willow, Golden—This is the common golden barked Willow. It makes a quick, cheap windbreak or screen.
5 to 6 ft., 50c each; \$4.00 per 10.

Willow, Niobe Weeping—A small tree, with graceful, golden, drooping branches. It is one of the best of the Weeping Willows.
6 to 8 ft., \$1.00 each; \$9.00 per 10. 5 to 6 ft., 60c each; \$5.00 per 10.

Weeping Willow

Cutleaf Weeping Birch

WINDBREAK TREES

We list here the smaller sizes of trees that are adapted to windbreak planting. Most of them are fast growing and many are very ornamental. For descriptions see pages 10 to 14.

Douglas Fir

Norway Spruce

American Arborvitae

APPLES

THESE trees are three years old and well branched. We grow only the varieties that are considered best for our climate.

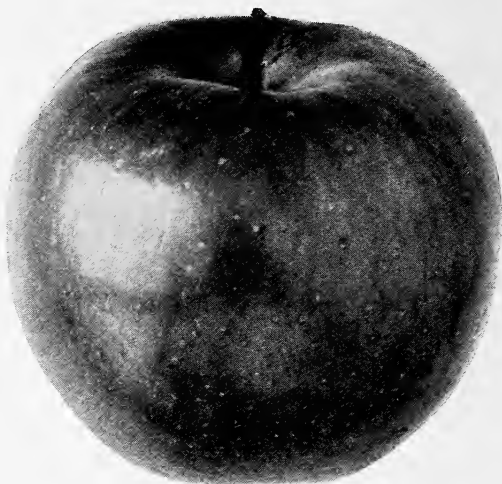

Prices of all Apple and Crab Apple trees:
5 to 6 ft., 65c each; \$5.50 per 10; \$40.00 per 100.

Delicious—A very high quality Apple suitable for Southern Minnesota, but to be tried only on a small scale in Central and Northern Minnesota or the Dakotas.

Duchess—Season, July and August. A vigorous growing, hardy tree and heavy bearer. Fruit is large, greenish yellow, striped with red. This is the standard early Apple for the Northwest.

Erickson—This apple was originated at Aitkin, Minn., a few years ago and is proving a real success as an early apple. The fruit which ripens about the same time as the Duchess, is very large and a deep red in color. The quality cannot be surpassed in an apple of this season.

Haralson—This new variety, which was originated at the Minnesota State Fruit Breeding Farm a few years ago, fills a long-felt want among apple growers of Minnesota. The fruit is about the same size and color as Wealthy, but later in season of ripening. A REAL WINTER

Wealthy

KEEPER. Unlike the Wealthy the fruit hangs to the tree until picked. The tree grows very symmetrical and is perfectly hardy in Minnesota.

McIntosh—McIntosh has been grown for many years in the East, but it has just recently been found to be hardy in Minnesota and the Northwest. We have had trees fruiting for the past eight years in our orchards. We find them very profitable and feel safe in recommending McIntosh for planting in all sections except Northern Minnesota. It is a very attractive, well colored apple of exceptionally high quality. The fruit keeps until late winter.

Northwestern Greening—A late winter Apple. The tree is a vigorous grower and fairly hardy. Fruit is very large; yellowish green when ripe; a good pie and baking Apple.

Patten's Greening—This Apple is popular on account of its hardiness and heavy yielding qualities. Fruit large, green with a pink blush; tree is thrifty and grows in a spreading form.

Strawberry Crab—An early Crab. Very hardy and good yielder. Used for eating raw and canning.

Sweet Russet—Somewhat larger than the other Crab varieties. A very heavy yielder. Fruit is sweet and tastes very much like pear. A good Apple for canning.

Transcendent—A well-known variety of Crab. The fruit is of the best for pickling or jelly.

Delicious

Virginia Crab—Very hardy and vigorous grower, does not blight, fruit fully as good as Transcendent for pickling or jelly. A prolific annual bearer.

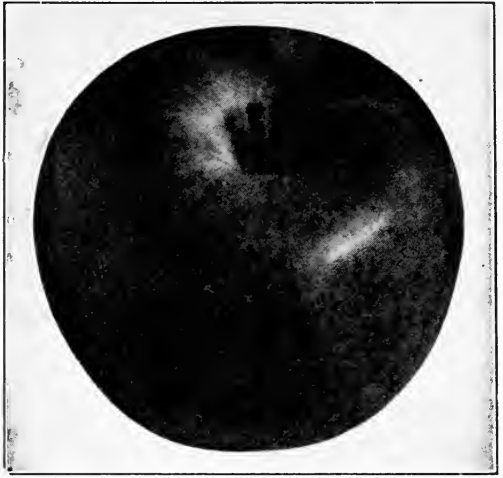

Wealthy—Wealthy is now considered the best Apple of its season both for home use and in commercial orchards. The tree is an upright grower and hardy. The fruit is medium to large in size, and colors up to a beautiful red; quality exceptionally good; will keep until January.

Whitney—This is a hybrid, but is usually considered in the Crab class. Trees thrifty and upright in growth, an abundant yielder, ripens in August, fruit very high in quality.

PEARS

Until recently the growing of Pears in the Northwest has been considered impractical, but we can now safely recommend the following varieties as being hardy. Our trees are budded on *Pyrus ussuriensis*, a hardy Pear seedling that stands this climate.

Pears may be planted on any good soil suitable

Haralson

for apple growing. Pruning and spraying is similar to that required for apples. Why not have a few hardy pears with your other orchard trees. The prices have been greatly reduced this year.

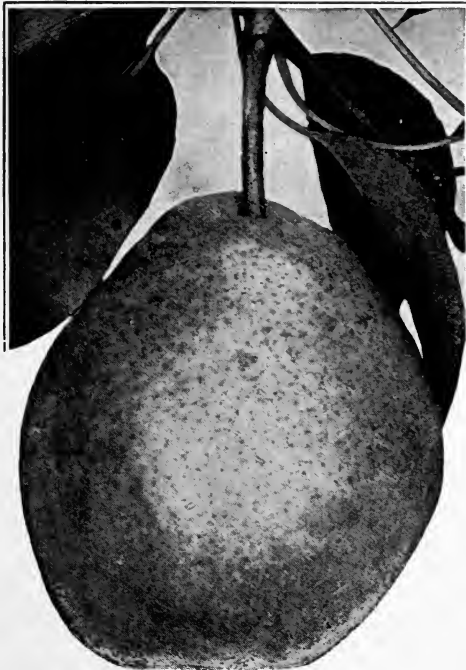

5 to 6 ft., 85c each; \$7.50 per 10.

4 to 5 ft., 60c each; \$5.00 per 10.

Minnesota No. 1—Tree a vigorous grower, perfectly hardy, blight resisting. Fruit large, good quality and heavy producer.

Mendel—Introduced by Mr. Pfaender of New Ulm, Minn. Tree is vigorous and is perfectly hardy. It is considered by many, equal to the Minnesota No. 1.

Tait No. 1—Was originated in Canada where the climate is much more severe than here in the U. S. It is a pear of high quality and a hardy, productive tree.

Minnesota No. 1 Pear

CARE OF NURSERY STOCK

When the stock is received, open the bundle in the shade out of the wind and, if you are not ready to plant immediately, heel the roots in the ground, soaking them well as you do. If well heeled in they can be kept without damage for a reasonable time. Ask for our free booklet on planting and care of nursery stock.

PLUMS

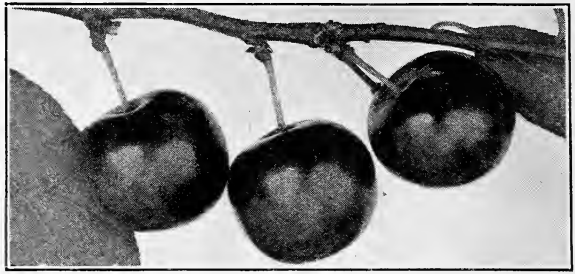

The following varieties of plums are far superior to the older varieties, and we feel perfectly safe in recommending them. They are very fast growing and usually come into bearing the second year after setting. They are perfectly hardy in our climate, and we have selected and propagated the following varieties which have shown exceptional qualities.

Prices on all Plum Trees: 5 to 6 ft., 65c each; \$5.50 per 10; \$40.00 per 100.

La Crescent—An extremely vigorous tree, bearing pure yellow fruit of highest quality and delicate texture; most promising as an early home variety, but too tender for shipping.

Monitor—A late mid-season variety, with a vigorous, well shaped tree, producing large, red, firm fleshed fruits of high quality.

Opata—A heavy yielder and very hardy.

Nicollet Cherry-Plum

Red Wing—One of the largest Plums; ripens mid-season, with beautiful, red, freestone fruits of high quality.

Sapa—A well-known introduction of Prof. Hanson's.

Tonka—An extremely productive variety, producing large, round, red fruit; of firm flesh and good quality.

Underwood—A large fruited, vigorous growing, early maturing variety, especially popular on account of its size, red color, earliness and high quality.

Waneta—Fruit is very large and the tree is exceptionally hardy.

Minn. No. 194—This new variety promises to surpass everything in the early varieties. Fruit is large and of high quality. We have a few one year old trees at \$1.25 each.

CHERRY-PLUMS

The hybrid Cherry-Plum, which is a cross between a plum and cherry, has the flavor of the cherry and is hardly like the native plum, and the birds do not bother them. They are heavy yielders and are excellent for canning. The following varieties are dwarf in their habit of growth which accounts for the smaller nursery tree.

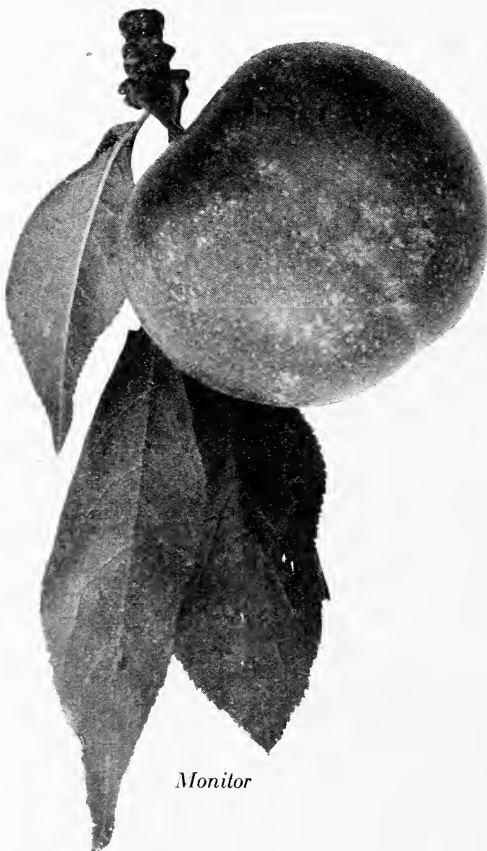

Prices of Cherry-Plums: 4 to 5 ft., 65c each; \$5.50 per 10; \$40.00 per 100.

Compass—A standard variety that is hard to surpass. An excellent canning cherry. Is a heavy yielder and bears regularly.

Nicollet—One of the latest productions of the Minnesota State Fruit Breeding Farm. The fruit almost a true cherry. When canned, one cannot detect the difference from canned cherries.

Zumbra—A hybrid containing the blood of the sweet cherry, wild pin cherry and sand cherry. It is a dwarf tree of the type of Sapa or Opata, a very productive variety. Quality is good, but should be thoroughly ripened before picking. Late mid-season.

Either Zumbra or Nicollet will bear fruit alone but cross polonization is more complete when the two are planted close together.

Monitor

CURRENTS

London Market—This has been our main crop variety for years, as it is a heavy yielder and the fruit is good in quality, although only medium in size. The bush is vigorous and upright in growth. While our price is lower for this variety, we recommend it as the best for the main crop.

2 year No. 1 Plants, 25c each; \$2.00 per 10; \$15.00 per 100; \$100.00 per 1000.

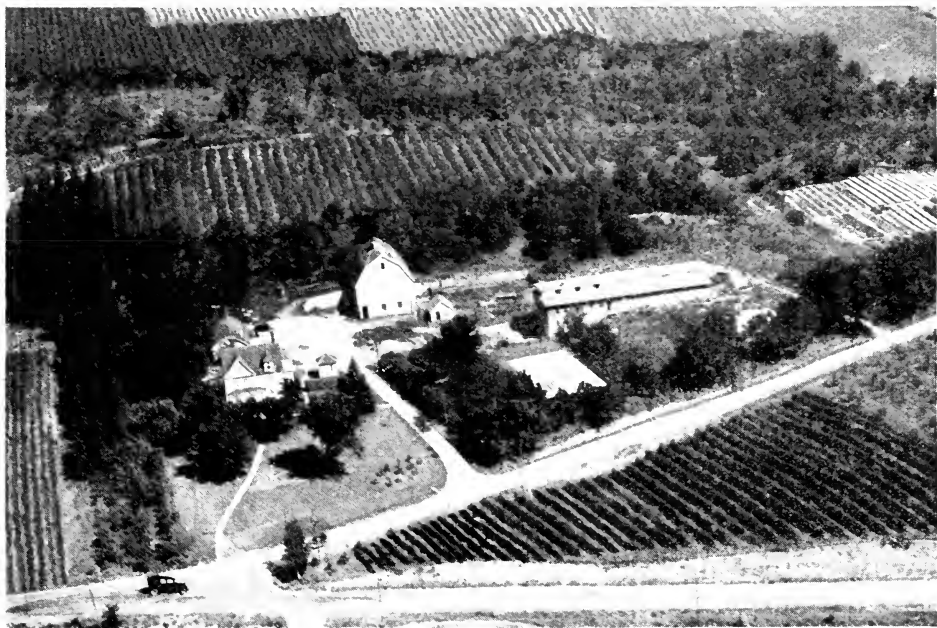

2 year No. 2 plants, 20c each; \$1.50 per 10; \$10.00 per 100; \$65.00 per 1000.

Minnesota No. 24—This new currant was originated recently at the Minnesota State Fruit Breeding Farm at Excelsior, Minnesota, and promises to replace all other varieties in the cherry currant class. The berry is very large and is borne on long stems forming exceptionally long well filled bunches. The quality of fruit is very good, the ripening season is medium and the plant a heavy yielder. While this new variety produces large berries in long bunches, its most valuable quality is the sturdy upright type of bush. This vigorous upright way of growing of No. 24 Currant is lacking in many of the older varieties. Because of the above qualities, No. 24 is undoubtedly going to be the leading currant.

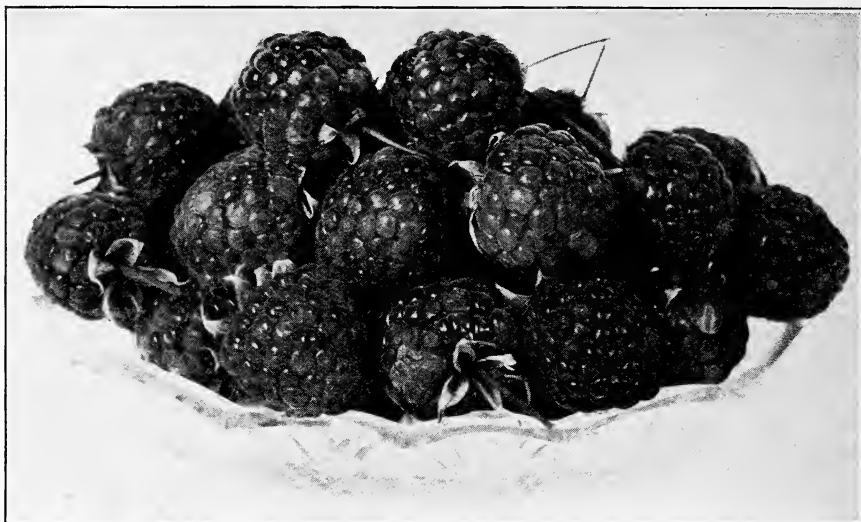

2 year No. 1, 40c each; \$3.50 per 10; \$25.00 per 100. 2 year No. 2, 25c each; \$2.00 per 10; \$15.00 per 100.

*Minnesota
No. 24
Currant*

Aerial view of part of the Nursery and buildings.

Chief (Minn. No. 223)

RASPBERRIES

Chief (Minnesota No. 223)—This new raspberry was originated recently at the Minnesota State Fruit Breeding Farm at Excelsior, Minnesota, and has already established itself as a berry filling an important place. The fruit, medium in size, bright red and firm, ripens early and extends over a long period, ripening even earlier than the King. The quality of fruit is excellent. On test plots for the past

Cumberland Black Raspberry

three years, the plant has outyielded all other varieties which were tested in adjoining plots, even outyielding Latham, which, up to the introduction of Chief, has been our heaviest yielder. The plants are vigorous in growth, perfectly hardy and seem to be almost resistant to mildew and mosaic. The wood ripens early and is a good plant maker. Chief has the good qualities looked for in a raspberry: earliness, hardiness, quality of fruit and yield.

No. 1 plants, \$1.75 per dozen; \$2.75 per 25; \$6.50 per 100; \$40.00 per 1000.

No. 2 plants, \$2.00 per 25; \$4.50 per 100; \$25.00 per 1000.

King—This is a well-known early ripening berry that proves very satisfactory.

No. 1 plants, \$2.00 per 25; \$5.00 per 100; \$30.00 per 1000.

Latham—Now the most popular Red Raspberry grown in this section of the country, as well as in the East. A late, large, bright red berry of good quality. Latham is hardy in the Northwest without winter protection.

No. 1 plants, \$2.00 per 25; \$5.00 per 100; \$30.00 per 1000. No. 2 plants, \$3.00 per 100; \$15.00 per 1000.

Cumberland Black Raspberry—One of the hardest of the Black Raspberries.

No. 1 plants, \$1.75 per dozen; \$6.50 per 100; \$40.00 per 1000.

GRAPES

WE propagate our Grape plants from wood taken from our own bearing vineyards, thus assuring plants that will be good yielders. We propagate Grapes in quantities, which permits us to offer them at these exceptionally low prices.

Strong two year old plants, 25c each; \$2.25 per 10; \$4.50 per 25; \$15.00 per 100.

2 year No. 2 plants, 15c each; \$1.25 per 10; \$2.50 per 25; \$8.00 per 100.

Alpha—A variety very similar to Beta. It equals Beta in yield, size and hardiness, and is claimed by many to surpass Beta in quality.

Beta—We advise the Beta above all others for Minnesota and the Northwest. The vines are as hardy as the wild grape, which means they do not require protection in the winter as many of the other varieties do. Fruit is of the best of quality to use for jelly or juice, as it has some of the wild grape flavor. Fruit is nearly as large as the Concord, and a much better yielder in this climate. Ripens the first of September.

Concord—A well-known variety of purple Grape which is semi-hardy in this climate.

White Niagara—A large variety of White Grape that is semi-hardy in Minnesota.

Beta

GOOSEBERRIES

Como—This is a vigorous grower, very productive, perfectly hardy and is not susceptible to the Gooseberry diseases. The ripe fruit is as green in color as it is before ripening.

2 year, No. 1, 30c each; \$2.50 per 10; \$20.00 per 100.

Carrie—This variety has become so well-known that we do not need to mention its many good qualities. It is nearly thornless, is practically disease resisting and a heavy yielder.

2 year No. 1, 25c each; \$2.25 per 10; \$15.00 per 100.

GARDEN SPECIALS

RHUBARB

Mammoth Victoria—This variety is larger and of better quality than any of the old varieties. Divided roots, 20c each; \$1.25 per 10.

ASPARAGUS

Martha Washington—This variety was recently originated by the U. S. Department of Agriculture and is proving itself far superior to the older varieties.

2 year old plants, 75c per 25; \$2.00 per 100; \$12.00 per 1000.

Como Gooseberry

STRAWBERRIES

SPECIAL care should be taken in the preparation of the soil before the plants are set. The strawberry has a comparatively shallow root system. For this reason moist soil is necessary when the plants are set. We make every effort to send strawberry plants out in the best of condition. Because of the many unavoidable conditions which may affect the success of a planting, we will not be responsible for the growth of strawberry plants.

JUNE BEARING VARIETIES

Beaver—A berry quite similar to Premier but sets plants a little heavier.
50c per 25; \$1.25 per 100; \$8.00 per 1000.

Blackmore—We offer this new berry for the first time this year. It is a very vigorous grower, hardy plant and heavy yielder. The fruit is uniform and a firm berry.
50c per 25; \$1.25 per 100; \$8.00 per 1000.

Premier (Staminate)—Plants grow large and are wonderfully productive. The berries are large and of a beautiful glossy red color. We have never found so many good qualities in an early berry.
50c per 25; \$1.25 per 100; \$8.00 per 1000.

Premier

Mastodon

Senator Dunlap (Staminate)—Is too well known to require description. It is still a very popular Strawberry.

40c per 25; \$1.00 per 100; \$6.00 per 1000.

EVERBEARING

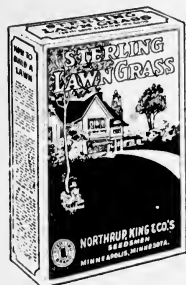

Everbearing Strawberries will provide luscious fruit throughout the Summer and early Fall, and we urge you to plant at least some of these varieties.

Progressive—A well-known standard variety, very productive, fruit medium in size, high quality.

75c per 25; \$2.00 per 100; \$11.00 per 1000.

Mastodon—We have tried out many varieties of Everbearing strawberries and have found Mastodon the best. It is a large strong plant which does well on any soil type. The fruit is large and high in quality. It is a variety we recommend as being superior to any other everbearer for commercial or home planting.

\$1.00 per 25; \$2.75 per 100; \$15.00 per 1000.

LAWN SEED

Seeding Lawn—Prepare the surface very thoroughly making certain that there are no soft spots that will settle later on. Seed one pound to every 300 square feet.

“Sterling” Mixture—Contains three of the finest grasses for lawn purposes—Kentucky bluegrass, red top, and white clover. Produces a fine texture turf of beautiful shade and long life. We recommend it as the most economical and satisfactory mixture.

1 pound cartons (10c extra for postage), 45c; 10 pound bags (25c extra for postage), \$1.00; 100 pound bags f.o.b. St. Paul, \$32.50.

“Parkview” Mixture—An excellent mixture quite similar to the Sterling mixture but containing a little domestic rye grass in addition to the varieties in the Sterling. Produces a very fine lawn.

10 pound bags (25c extra for postage), \$3.25; 100 pound bags, f.o.b. St. Paul, \$30.00.

FERTILIZER

We have tried out many fertilizers and find “Gromor” to be an excellent mixture for the lawn and shrubs. Put an application on and see the difference in the color of your lawn and in a few days you will not see any thin spots as each individual plant spreads out forming a dense mat.

Apply about three pounds per 100 square feet of lawn. For shrubbery one pound to 10 square feet.

5 pound cans (15c extra for postage), 50c; 25 pound bags (f.o.b. St. Paul), \$1.75; 50 pound

bags (f.o.b. St. Paul), \$3.00; 100 pound bags (f.o.b. St. Paul), \$5.00.
